

Why partner with Optum?

Innovative product

Our Flow Optimizer™ drag reducer technology is a proprietary, superior performing product that has proven to maximize operations and profitability in a wide variety of applications. Optum invests heavily in research & development of innovative DRA technology and manufactures all its products using the Best Available Technology (BAT) to optimize pipeline performance and achieve performance excellence for our customers.

Committed team

Optum has assembled a high caliber team of experts with close to a century of combined leadership experience and specialized knowledge in the global drag reduction industry. Whether it's creative pipeline modeling, dependable logistics or dedicated field service, together, the team fosters a working ethos that values customers' success and strong, long-term partnerships.

Uniquely Dependable

Optum makes a daily commitment to supply quality and consistent products with full field support services. We have the capacity to ship DRA product from our state-of-the-art manufacturing facility to anywhere in the world. Our team of engineers will work with every client to analyze their pipeline system and provide solutions for optimal DRA usage. Throughout a project's lifecycle, Optum is dedicated to continuous support and optimal performance.

Optum Energy Solutions is committed to continuous improvement by embracing change and seeking ever-more creative solutions to optimizing pipeline flow rates.

In short, Optum can be relied upon to deliver innovative optimization solutions to the global pipeline industry safely, consistently and creatively.
